ASME Pipeline Essentials (for standards pairing please call)

Process Piping B31.3 - 2014 ASME
B31.3 contains requirements for piping typically found in petroleum refineries; chemical, pharmaceutical, textile, paper, semiconductor, and cryogenic plants; and related processing plants and terminals. It covers materials and components, design, fabrication, assembly, erection, examination, inspection, and testing of piping.

Gas Transmission and Distribution Piping Systems B31.8 - 2014 This covers gas transmission and distribution piping systems, including gas pipelines, gas compressor stations, gas metering and regulation stations, gas mains, and service lines up to the outlet of the customer's meter set assembly. It includes gas transmission and gathering pipelines, including appurtenances that are installed offshore for the purpose of transporting gas from production facilities to onshore locations; gas storage equipment of the closed pipe type that is fabricated or forged from pipe or fabricated from pipe and fittings.

Manual for Determining the Remaining Strength of Corroded Pipelines B31G - 2012
This document is intended solely for the purpose of providing guidance in the evaluation of metal loss in pressurized pipelines and piping systems. It is applicable to all pipelines and piping systems that are part of ASME B31 Code for Pressure Piping, i.e., ASME B31.4 Pipeline Transportation Systems for Liquid Hydrocarbons.
